P E T I T I O N

Advocates for alternative healthcare and The CONSUMER HEALTH FREEDOM ACT, NC House Bill 1358

We, the undersigned, **support natural health**, alternative healthcare and the CONSUMER HEALTH FREEDOM ACT.
We urge all North Carolina Legislators to support this important legislation, HB 1358, in 2007/2008.

The Consumer Health Freedom Act will do two important things. First, it will narrow the scope of the health care professions' practice acts so that complementary and alternative medicine, or CAM, practices that are so safe they don't qualify for professional licensure - such as homeopathy - may be practiced by people who aren't members of the licensed health care professions.

Second, the Act will provide consumers with important information about their healthcare choices, such as CAM practitioners and therapies (Natural Health Remedies), Nutritional Healing, diet, vitamins and herbs, etc. This bill will allow consumers to legally make informed choices about their own health care, including complementary and alternative health care services.
